A Matter of Health

T costs more to make Royal Baking Powder IT costs more to make Royal Baking Powder I than any other, because its ingredients are more highly refined and expensive. But the Royal is correspondingly purer and higher in leavening strength, and of greater money value to the consumer. The difference in cost of Royal over the best of the others does not equal the difference in leavening strength, nor make good the inferior work of the cheeper powders nor remove the impurities which such powders leave in the food.

Where the finest food is required, the Royal Baking Powder only can be used.

Where the question of health is considered, no baking powder but Royal can be used with safety. All others are shown by official analyses to contain lime, ammonia or alum.
